Art Unit: 2834

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to an ultrasonic motor, classified in class 310, subclass 323.02.
- II. Claims 11-14, drawn to a method of manufacturing a piezoelectric motor, classified in class 29, subclass 25.35.

(f) he did not himself invent the subject matter sought to be patented.

Claim*** rejected under 35 U.S.C. 102(d) as being barred by applicant's ***. ***.

Group I can be made by methods other than those of Group II, e.g. the connective arrangement could be pre formed in the bent or folded configuration prior to assembly.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
